

# REFURBISHMENT - Updating Your System to Function Like New

THE PREMIER REPAIR, REPLACEMENT AND REFURBISHMENT PROGRAM

The demand on power generation is ever growing while your customers' demands for uninterrupted service are growing just as fast. Your power facility's bus duct equipment is the critical link, and there is no margin for error. To help ensure that your isolated phase bus system is working at top efficiency and remains operational, we invite you to take advantage of the exclusive *Repair, Replacement and Refurbishment Program* from Powell Electrical Systems, Inc. - Delta/Unibus Division.

## UPGRADE EXISTING EQUIPMENT

Often the best course of action at a facility is to upgrade existing equipment to meet industry standards. At Powell, the final facet of the RRR plan is the refurbishment and upgrade of a system to help your facility remain operational in today's power market.

At Powell, we have the engineering expertise to consult on any upgrade project. After reviewing your facility's equipment, our team will develop a comprehensive plan. Once approved, we get right to work, upgrading your existing system.

Powell also has the capability to refurbish cooling systems and additional equipment.

## PREMIER SERVICES

Powell is the premier designer, manufacturer and supplier of a comprehensive line of isolated phase bus, non-segregated phase bus, segregated phase bus, cable bus and bus accessories across the U.S. We are committed to providing the best equipment and service in the industry. Our skilled team is experienced in all areas of preventive maintenance, and our comprehensive Repair, Replace and Refurbishment (RRR) Program is designed to help primarily power facilities maintain optimal and efficient operation.

## OUTSTANDING VALUE

We own and support legacy product lines including Delta-Star, HK Porter, Unibus and Westinghouse as well as our current product line, Delta/Unibus. We adhere to high standards of quality on every job we perform, and we design our products with safety in mind.

### OUR REFURBISHMENT PROGRAM INCLUDES:

- Engineering expertise for upgrades
- Modifications to existing systems
- Cooling systems and additional equipment
- Designs include H.K. Porter, Delta-Star, Unibus and Westinghouse Isolated Phase Bus Systems
- Ability to Integrate into most bus systems

### WHO WE SERVE

Powell serves the needs of managers and other professionals who are involved in the repair, replacement or refurbishment of mission-critical equipment at energy production facilities, in market segments that include:

- Oil and Gas Refining
- Offshore Oil and Gas Production
- Petrochemical
- Traction Power
- Electrical Utilities
- Cogeneration
- Heavy Industrial
- Paper

### Our Team

We specialize in bus technology, equipment life extensions, upgrades, and repair. Rely on our team to get the job done, no matter if you are relying on us for repair, replacement, or refurbishment.

### Standards

Bus Duct Systems are designed, manufactured and tested in strict accordance with ANSI/IEEE, NEMA and NEC standards. Our Northlake facility is ISO 9001:2000 registered.

### Experience

We are considered the foremost producer of custom-designed bus systems to provide a fully integrated, totally coordinated system.
