

# REPAIR - We'll Get You Back Up and Running

THE PREMIER REPAIR, REPLACEMENT AND REFURBISHMENT PROGRAM

The power generation industry has little margin for error. Power demands are high, and your bus system is the critical link. You can help ensure that your Isolated Phase Bus system is working at top efficiency by taking advantage of the exclusive *Repair, Replacement and Refurbishment Program* from Powell Electrical Systems, Inc. - Delta/Unibus Division.

## RELY ON EXPERTS

It's inevitable that equipment in your facility will break down due to wear and tear, age, debris or lack of proper maintenance. When it happens, you need to rely on experts to discover the root cause and create a plan to repair the equipment quickly.

At Powell, we provide engineering services and field services to help you identify and analyze equipment that is need of repair. Once the inventory is completed, our team will put together a repair plan for you. With our comprehensive approach, we will get equipment repaired and back up and running again.

When onsite maintenance is required, highly skilled field technicians assist with system solutions that are designed to minimize operational downtime. Repair of equipment is completed according to a plan that is reviewed and approved by you ahead of time.

## OUTSTANDING VALUE

We own and support legacy product lines including Delta-Star, HK Porter, Unibus and Westinghouse as well as our current product line, Delta/Unibus. We adhere to high standards of quality on every job we perform.

## PREMIER SERVICES

Powell is the premier designer, manufacturer and supplier of a comprehensive line of isolated phase bus, non-segregated phase bus, segregated phase bus, cable bus and bus accessories across the U.S. We are committed to providing the best equipment and service in the industry. Our skilled team is experienced in all areas of preventive maintenance, and our comprehensive Repair, Replace and Refurbishment (RRR) Program is designed to help primarily power facilities maintain optimal and efficient operation.
