

REPLACEMENT - The Right Parts at the Right Time

THE PREMIER REPAIR, REPLACEMENT AND REFURBISHMENT PROGRAM

The demand for uninterrupted power supply continues to increase. When it comes to your power facility's bus duct equipment, there is no margin for error. You can help ensure that your isolated phase bus system is working at top efficiency by taking advantage of the exclusive *Repair, Replacement and Refurbishment Program* from Powell Electrical Systems, Inc. - Delta/Unibus Division.

COMPREHENSIVE PLAN

We appreciate that each power facility is unique. That's why our skilled technicians will work with each organization to create a comprehensive plan when critical equipment needs replacement. We work closely with you to identify the equipment that is damaged, aging or out-of-date. Once that inventory is completed, we will get to work in securing and replacing each part, and will get them installed.

The replacement plan can accommodate complete system replacement or replacement of individual parts, to avoid costly down time for your facility.

Powell is also able to provide a range of specialty and custom-fit parts to meet the unique needs of each facility. This includes the provision of specialty cubicles and accessories.

PREMIER SERVICES

Powell is the premier designer, manufacturer and supplier of a comprehensive line of isolated phase bus, non-segregated phase bus, segregated phase bus, cable bus and bus accessories across the U.S. We are committed to providing the best equipment and service in the industry. Our skilled team is experienced in all areas of preventive maintenance, and our comprehensive Repair, Replace and Refurbishment (RRR) Program is designed to help primarily power facilities maintain optimal and efficient operation.

OUTSTANDING VALUE

We own and support legacy product lines including Delta-Star, HK Porter, Unibus and Westinghouse as well as our current product line, Delta/Unibus. We adhere to high standards of quality on every job we perform, and we design our products with safety in mind.

OUR REPLACEMENT PROGRAM INCLUDES:

- Change-out of aged or outdated equipment
- Custom fit to existing equipment
- Fully integrated system components
- Specialty cubicles and accessories

WHO WE SERVE

Powell Electrical Systems, Inc. - Delta/Unibus Division serves the needs of managers and other professionals who are involved in the repair, replacement or refurbishment of mission-critical equipment at energy production facilities, in market segments that include:

- Oil and Gas Refining
- Offshore Oil and Gas Production
- Petrochemical
